

SUPPLIER AND PRODUCT PORTFOLIO

We support your needs with the best possible solutions.

All cell culture products are manufactured in Allschwil, Switzerland.

BioConcept is specialized in customized cell culture media including liquid and powder media.

BioConcept supports its customers with a comprehensive and high-tech product portfolio, supplying reagents, disposables, laboratory equipment and more ...

Focus on Solutions

BioConcept is manufacturing classical and customized cell culture media and sterile solutions and buffers as well as defined media for recombinant protein production. Furthermore, the production facilities are equipped to manufacture Water for injection (WFI).

Our product line includes:

- Standard and customized liquid and powder media
- Production media for CHO, Hybridoma and Insect Cells
- Serum Free media
- Chemically Defined media
- Animal Component Free (ACF) media
- Water for Injection (WFI)
- Buffers and salt solutions
- Supplements and auxiliary reagents
- Animal sera

We offer a high degree of flexibility and customization in a timely manner.

Options:

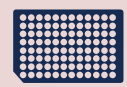

- Modifications of standard products
- New products according to customers recipes
- Variable batch sizes
- Variable packaging sizes
- Variable tubing and connection options
- Sterilization through sterile filtration (0.22um/0.1um) or hot air/vapour sterilization

Services

BioConcept
Pipette Care®

Pipette Service for servicing and calibrating all brands of pipettes

BioConcept
Cycler Care®

Thermal Performance and Validation of PCR and qPCR instruments

BioConcept
Instrument Care®

Calibration and Service of Microplate Readers, Washers, Dispensers and Stackers

Life Science Supplies & Lab Equipment

BioConcept Ltd. is also a distributor of high quality suppliers and supports its customers with a comprehensive and high-tech product portfolio, including reagents, disposables, laboratory equipment, instrumentation and services for applications in Cell Biology, Molecular Biology, Microbiology and Immunology.

Cell Culture products and Life Science supplies

Validated antibodies, kits and services

Recombinant cell culture proteins and Cytokines

Tissue dissociation enzymes

Immunological reagents, antibodies, kits and blood products

LED based microplate readers

Plastic specialities for your laboratory

Protein detection technologies, reagents and systems

Microplate sealing films and foils

Thermocycler validation service

Primary human cells and IHC services

Conjugated antibodies, isotype controls and cell culture reagents

Histologically diagnosed FFPE tissue blocks

Eucaryotic gene expression

Primary antibodies against tags and conjugated secondary antibodies

Tissue culture plastics

PCR and qPCR instruments and Molecular Biology reagents and kits

Antibodies and assays for innate immunity, inflammation and cell damage

Mechanical and electronic pipettes and tips

Microplate readers, washers, dispensers and pipettes

The molecular biology company
