Focus on Cell Culture Solutions

Founded in 1978 BioConcept Ltd. has become a leading supplier for customized cell culture media and defined media for recombinant protein production. We combine experience with an innovative spirit to support our customer's needs with the best possible solutions.

BioConcept is manufacturing classical and customized cell culture media and sterile solutions and buffers as well as defined media for recombinant protein production. Furthermore, the production facilities are equipped to manufacture Water for injection (WFI).

Our product line includes:

- Standard and customized liquid and powder media
- Production media for CHO, Hybridoma and Insect Cells
- Serum Free media
- Chemically Defined media
- Animal Component Free (ACF) media
- Water for Injection (WFI)
- Buffers and salt solutions
- Supplements and auxiliary reagents
- Animal sera

We offer a high degree of flexibility and customization in a timely manner.

Options:

- Modifications of standard products
- New products according to customers recipes
- Variable batch sizes
- Variable packaging sizes
- Variable tubing and connection options
- Sterilization through sterile filtration (0.22um/0.1um) or hot air/vapour sterilization

Quality and partnership – a promise.

BioConcept establishes close relationships with its customers to be able to respond their wishes. To guarantee that our products are of the highest standard BioConcept produces within a certified quality management system (ISO 0991) since 1995. We are approved and certified under the current ISO 9001 version.
