Service: Calibration is carried out according to ISO 8655 specifications. Disassembly and cleaning of pistons, tip cones, springs etc. are included in all our services excluding Fast Check. The costs of preventative exchange of wear parts are not included.

Repair: If necessary the pipette will be repaired and all affected parts will be replaced. If the cost of repair is up to 150.00 CHF for a single-channel pipette and 300.00 CHF for a multi-channel or an electronic pipette the repair will be carried out without notice, if they are higher the repair will be carried out by agreement.

Estimate of cost: We will provide an estimate of costs on request. If the pipette will be repaired there will be no charge for the estimate of costs. If the pipette will not be repaired we charge a handling fee of 90.00 CHF for a single-channel pipette and 140.00 CHF for a multi-channel pipette.

Decontamination of pipettes should be carried out prior to Pipette Care staff working on your pipettes. To comply with our health and safety policy, Pipette Care will not be able to service any instruments that we do not have a satisfactory statement of decontamination for. You may use the form supplied by us. We may have to charge an extra 20.00 CHF for cleaning pipettes which are not cleaned sufficiently.
